October 299-415

Abrahams, Athol D., Divide Angles and Their Relation to Interior Link Lengths in Natural Channel Networks, 157-71

Angel, S., and G. M. Hyman, *Urban Fields: A Geometry of Movement for Regional Science,* reviewed, 282-83

Applied Linear Programming for the Socioeconomic and Environmental Sciences, Michael R. Greenberg, reviewed, 293-95

Barber, Gerald M., book review, 285-87

Barber, Gerald M., and Bruce A. Ralston, The Elementary Dynamics of Road Development, 258-63

Barrett, E. C., and C. F. Curtis, *Introduction to Environmental Remote Sensing,* reviewed, 289-91

Bazaraa, Mokhtar S., and John J. Jarvis, *Linear Programming and Network Flows,* reviewed, 93-95

Beaumont, John R., and Paul Keys, A Theoretical Basis for Diffusion in a Central Place System, 269-73

Beavon, K. S. O., *Central Place Theory: A Reinterpretation,* reviewed, 282-83

Boundary Layer Climates, T. R. Oke, reviewed, 287-88

Buck, Andrew J., and Simon Hakim, Model Selection in Analyzing Spatial Groups in Regression Analysis, 392-98

Carlstein, Tommy, Don Parkes, and Nigel Thrift, (eds.), *Timing Space and Spacing Time,* reviewed, 274-77

Casetti, Emilio, Equilibrium Population Partitions between Urban and Agricultural Occupations, 47-54

Central Limit Theorem for Spatial Samples, A, Tony E. Smith, 299-324

Central Place Theory: A Reinterpretation, K. S. O. Beavon, reviewed, 282-83

Clark, W. A. V., and Eric G. Moore, (eds.), *Population Mobility and Residential Change,* reviewed, 279-82

Cliff, A. D., and J. K. Ord, On Statistical Models for Spatial Diffusion Processes, 263-69

Computational Methods of Multivariate Analysis in Physical Geography, P. M. Mather, reviewed, 295-98

Cromley, Robert G., book review, 293-95

Day, Richard H., and Alessandro Cigno, (eds.), *Modelling Economic Change: The Recursive Programming Approach,* reviewed, 285-87

Dear, Michael. *See* Webber, M. J.

Demoeconomic Model of Interregional Growth Rate Differences, A, Jacques Ledent and Peter Gordon, 55-67

Dendrinos, Dimitrios S., Dynamics of City Size and Structural Stability: The Case of a Single City, 236-44

Descriptive Model of Constrained Residential Search, A, Robert Meyer, 21-32

Divide Angles and Their Relation to Interior Link Lengths in Natural Channel Networks, Athol D. Abrahams, 157-71

Do Cities Grow by Natural Increase or by Migration?, Nathan Keyfitz, 142-56

Dynamics of City Size and Structural Stability: The Case of a Single City, Dimitrios S. Dendrinos, 236-44

Ebdon, David, *Statistics in Geography: A Practical Approach,* reviewed, 411-12

Economic Theory and the Cities, J. V. Henderson, reviewed, 277-79

Elementary Dynamics of Road Development, The, Gerald M. Barber and Bruce A. Ralston, 258-63

Estes, John E., book review, 289-91

Equilibrium Population Partitions between Urban and Agricultural Occupations, Emilio Casetti, 47-54

Fotheringham, A. Stewart, and M. J. Webber, Spatial Structure and the Parameters of Spatial Interaction Models, 33-46

Goodchild, Michael F., book review, 411-12

Gordon, Peter. *See* Ledent, Jacques

Greenberg, Michael R., *Applied Linear Programming for the Socioeconomic and Environmental Sciences,* reviewed, 293-95

Griffith, Daniel A., Towards a Theory of Spatial Statistics, 325-39

Haining, Robert P., *Specification and Estimation Problems in Models of Spatial Dependence,* reviewed, 291-93

Hakim, Simon. *See* Buck, Andrew J.

Hanson, Susan, Spatial Diversification and Multipurpose Travel: Implications for Choice Theory, 245-57

Henderson, J. V., *Economic Theory and the Cities,* reviewed, 277-79

Interurban Linkages Through Polynomially Constrained Distributed Lags, Bruce Wm. Pigozzi, 340-52

Introduction to Environmental Remote Sensing, E. C. Barrett and C. F. Curtis, reviewed, 289-91

Ishikawa, Hideaki, A New Model for the Population Density Distribution in an Isolated City, 223-35

Jones, Richard C., The Role of Perception in Urban In-Migration: A Path Analytic Model, 98-108

Keyfitz, Nathan, Do Cities Grow by Natural Increase or by Migration?, 142-56

Keys, Paul. *See* Beaumont, John R.

Ledent, Jacques, and Peter Gordon, A Demoeconomic Model of Interregional Growth Rate Differences, 55-67

Lewis, Peter, *Maps and Statistics*, reviewed, 411-12

Li, Si-Ming, Urban Transportation Pricing: An Examination of the Rules Suggested by Strotz and Vickrey, 195-200

Linear Programming and Network Flows, Mokhtar S. Bazaraa and John J. Jarvis, reviewed, 293-95

Location and the Demand for Travel, Eric S. Sheppard, 111-28

Locational Decisions on Stochastic Networks, Pitu B. Mirchandani, 172-83

Locational Push-Pull Analysis of Migration Streams, Michael Sonis, 80-97

Maps and Statistics, Peter Lewis, reviewed, 411-12

Massey, Douglas S., Lucky M. Tedrow, and G. Edward Stephan, Regional Population Density and County Size: A Note on the Problem of Tautology in Size-Density Relationships, 184-88

Mather, P. M., *Computational Methods of Multivariate Analysis in Physical Geography*, reviewed, 295-98

Matula, David W., and Robert R. Sokal, Properties of Gabriel Graphs Relevant to Geographic Variation Research and the Clustering of Points in the Plane, 205-22

Meyer, Robert, A Descriptive Model of Constrained Residential Search, 21-32

Mirchandani, Pitu B., Locational Decisions on Stochastic Networks, 172-83

Model Selection in Analyzing Spatial Groups in Regression Analysis, Andrew J. Buck and Simon Hakim, 392-98

Modeling the Daytime Urban Surface Energy Balance, M. Nunez and T. R. Oke, 373-86

Modelling Economic Change: The Recursive Programming Approach, Richard H. Day and Alessandro Cigno, (eds.) reviewed, 285-87

Models of Cities and Regions: Theoretical and Empirical Developments, A. G. Wilson, P. H. Rees, and C. M. Leigh, (eds.), reviewed, 283-85

Morgan, David J., *Patterns of Population Distribution: A Residential Preference Model and Its Dynamic*, reviewed, 279-82

Morrow-Jones, Charles R., book review, 283-85

Morrow-Jones, Hazel A., book review 279-82

New Model for the Population Density Distribution in an Isolated City, A, Hideaki Ishikawa, 223-35

Nunez, M., and T. R. Oke, Modeling the Daytime Urban Surface Energy Balance, 373-86

Ocean-Atmosphere System, A. H. Perry and J. M. Walker, reviewed, 287-88

Oke, T. R., Boundary Layer Climates, reviewed, 287-88; *see* Nunez, M.

On Statistical Models for Spatial Diffusion Processes, A. D. Cliff and J. K. Ord, 263-69

On the Efficiency and Optimality of Spatially Structured Personal Information Fields, with Some Implications for Heterogeneous Social Aggregates, Terence R. Smith, 1-20

On the Issue of Orderedness in Social Accounting Models of Residential Change, Vincent B. Robinson and Jack J. Utano, 399-410

Ord, J. K., Tests of Significance Using Nonnormal Data, 387-92; *see* Cliff, A.D.

Papageorgiou, G. J., book review, 277-79

Patterns of Population Distribution: A Residential Preference Model and Its Dynamic, David J. Morgan, reviewed, 279-82

Perry, A. H., and J. M. Walker, *Ocean-Atmosphere System*, reviewed, 287-88

Persistence and Climatic Change, Richard H. Skaggs, 189-95

CORRECTION

In the paper "Divide Angles and Their Relation to Interior Link Lengths in Natural Channel Networks" by Athol D. Abrahams (*Geographical Analysis*, vol. 12, no. 2, 1980), the lines $Z_I = \psi - X_2$ and $\varphi = (180 - E_1 + X_1 - X_3)/2$ in Figure 5 on page 163 should read $Z_I^* = \psi X_2$ and $\varphi = (180 - E_1 + X_3 - X_4)/2$, respectively.
